Hiring Process Analytics

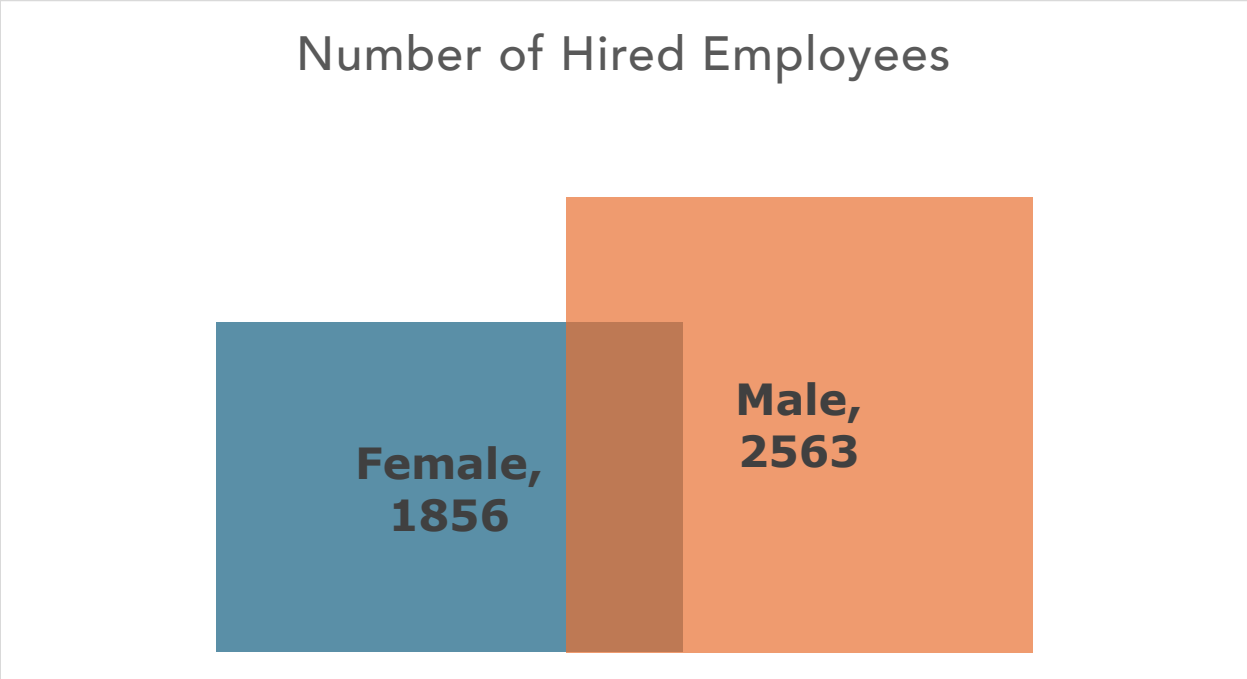

A. Hiring Analysis: The hiring process involves bringing new individuals into the organization for various roles.

Your Task: Determine the gender distribution of hires. How many males and females have been hired by the company?

ANS.

Status	Hired

	Gender		
	Female	Male	Grand Total
Count of Employees	1856	2563	4419

INSIGHT: Male Candidates Were Hired More Than Females.

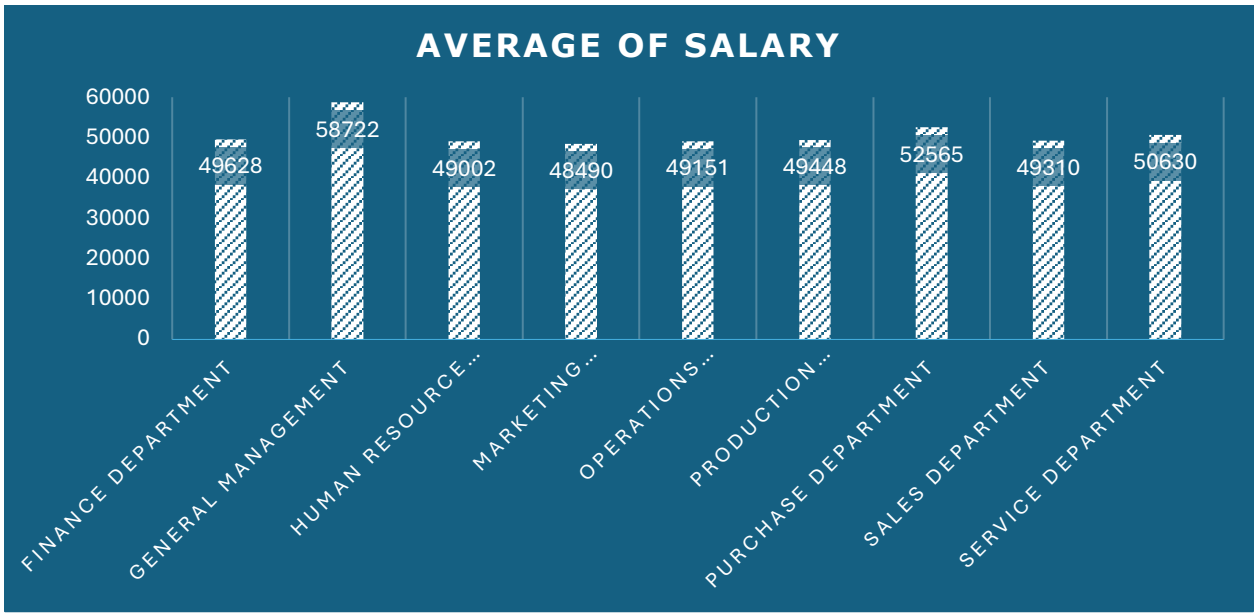

B. Salary Analysis: The average salary is calculated by adding up the salaries of a group of employees and then dividing the total by the number of employees.

Your Task: What is the average salary offered by this company? Use Excel functions to calculate this.

ANS.

Department	Average of Salary
Finance Department	49628
General Management	58722
Human Resource Department	49002
Marketing Department	48490
Operations Department	49151
Production Department	49448
Purchase Department	52565
Sales Department	49310
Service Department	50630
Grand Total	49983

USING AVERAGE FUNCTION	**49983**

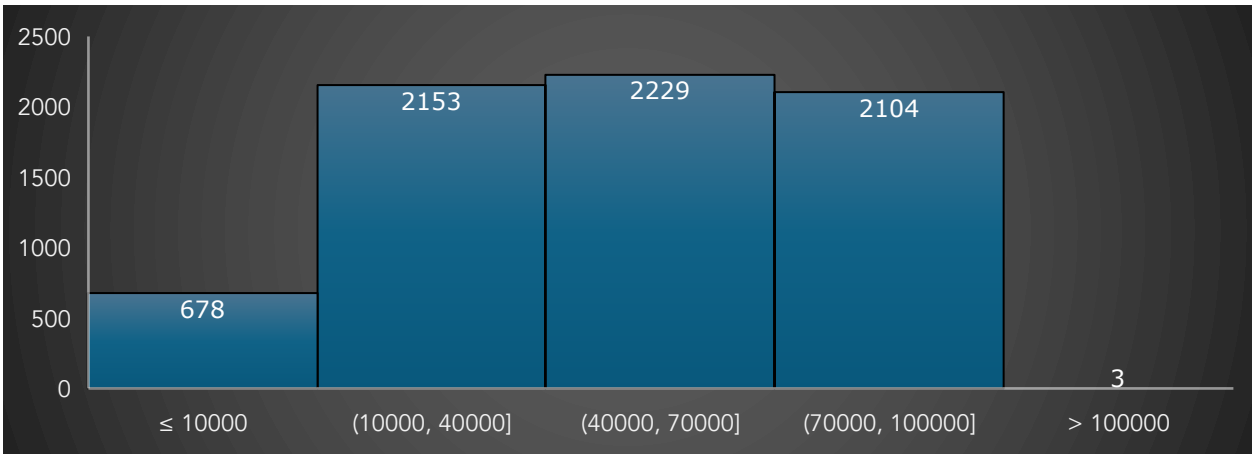

INSIGHTS: General Management Has Highest And Marketing Department With Least Average Salary.

C. Salary Distribution: Class intervals represent ranges of values, in this case, salary ranges. The class interval is the difference between the upper and lower limits of a class.

Your Task: Create class intervals for the salaries in the company. This will help you understand the salary distribution.

ANS.

INSIGHTS: Most Employees Earn Salaries Ranging From 40k To 70k.

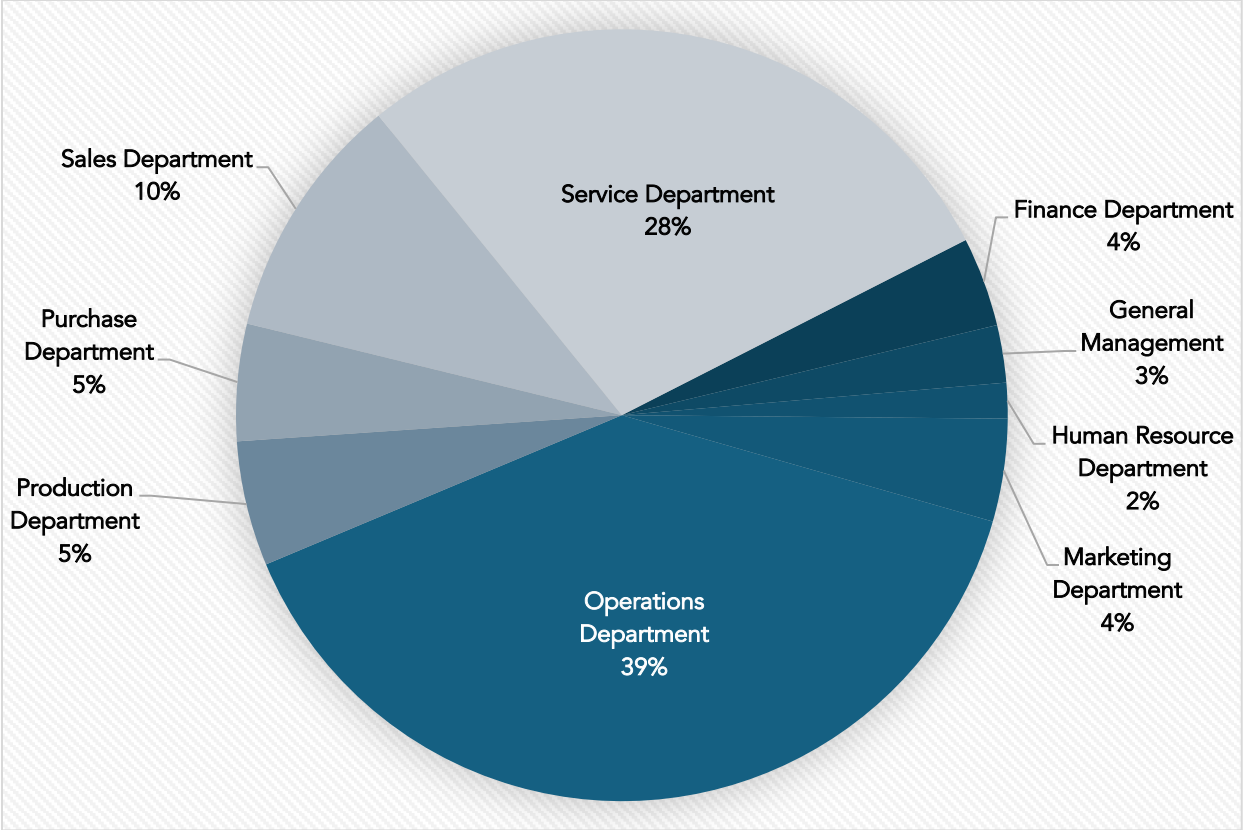

D. Departmental Analysis: Visualizing data through charts and plots is a crucial part of data analysis.

Your Task: Use a pie chart, bar graph, or any other suitable visualization to show the proportion of people working in different departments.

ANS.
